NASA Internship Opportunity STEM Into Science with DEVELOP!

DEVELOP is a NASA Science Mission Directorate, Applied Sciences training and development program. Students work on Earth science research projects, mentored by science advisors from NASA and partner agencies, and extend research results to local communities. The projects demonstrate to community leaders how NASA science measurements and predictions can be utilized to address local policy issues. Internship opportunities with DEVELOP are offered through Science Systems and Applications, Inc.

Summer Term Application Deadline: Jan 30
Summer Term: June 04 - Aug 10

DEVELOP internship at NASA Stennis Space Center.

For more information and to download the DEVELOP application, visit us at <http://develop.larc.nasa.gov>, or contact us at NASA-DL-DEVELOP@mail.nasa.gov or (757) 864-3761.

Project Example – Gulf of Mexico Ecological Forecasting:

DEVELOP students used chlorophyll and fluorescence line height (FLH) data products generated from the MODIS sensor aboard the Aqua and Terra satellites to characterize chlorophyll anomalies from 2003 – 2011 in the vicinity of the Flower Garden Banks National Marine Sanctuary (FGBNMS). Project results were transferred to scientific management staff at the FGBNMS to provide information useful for refining NOAA research/monitoring activities.
